

New colour for angle-adjustable legrests!

From the end of
August/beginning of
September, legrests
will be supplied in
black.

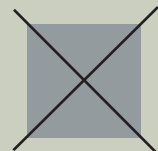

BEFORE

CE/CES model

CED/CEDS model

Other models

NOW

New colour,
all models

All wheelchairs with silver frame colour will, from the end of August/beginning of September, come with black angle-adjustable legrests. Netti 4U comfort|CE and CES (blue frame colour) will also be supplied with black adjustable legrests from the same date. Netti 4U comfort|CED and CEDS (graphite grey frame colour) will be supplied with black adjustable legrests from a later date.

This is a BIG advantage: all adjustable legrests will now be useable on all wheelchair models regardless of frame colour. This change will be implemented on all legrests in the coming period. Changeover may take up to six months or more, depending on stocks held.
